

Reliability, Efficiency and Integrity Process-

F I N A L

Review, Facilitated Self Assessment or Peer Validation, with passing score, required to advance to the next stage.

Reliability Metrics

Metric Name	Definition
Major Rotating Equipment Availability	% of time major or critical rotating equipment is available to perform function
Major Rotating Equipment Reliability	% of time major or critical rotating equipment is available to perform function excluding PM downtime
PM Compliance	% of PMs completed on schedule
Proactive Work	% of work that is PM, PdM, Inspection and resulting corrective work
Reactive Work	% of work that is directed at addressing failures
Percent Schedule Compliance	Completed Task Hours / Scheduled Task Hours
